# ...Loyalty...

If you work for a man, in Heaven's name WORK FOR HIM. If he pays you wages that supply your bread and butter, work for him; speak well of him; stand by him and stand by the institution he represents. If put to a pinch, AN OUNCE OF LOYALTY is worth a pound of cleverness. If you must vilify, condemn and eternally disparage, why, resign your position, and when you are outside condemn to your heart's content. But as long as you are a part of the institution do not condemn it. If you do, you are loosening the tendrils that hold you to the institution, and the first high wind that comes along you will be uprooted and blown away, and probably you will never know why.

# PREFACE

---

## North Carolina

---

The first attempt at colonization was made in 1548 by the illustrious Sir Walter Raleigh.

North Carolina was foremost to resist British tyranny. First pitched battle fought at Alamance May 12, 1771. Declaration of Independence signed at Mecklenburg, 1776. North Carolina lost 35,124 soldiers during the Civil War, having furnished more and lost a greater number of soldiers than any other Southern State (number from North Carolina, 125,000).

The population is of a singularly homogeneous character, being Virginians, mainly English, Pennsylvanians, mainly Scotch-Irish and German; Scotch-Irish, Scotch Highlanders and Lowlanders, Swiss and French Huguenots. Population, nearly 2,000,000.

North Carolina's position is nearly between the parallels 34 degrees and 36½ degrees north latitude, and between the meridians 75½ degrees and 84½ degrees west longitude. Extreme length, 503¼ miles; extreme breadth, 187½ miles; average breadth, 100 miles; area, 52,286 square miles, of which 48,666 is land and 3,620 is water.

Mt. Mitchell, 6,711 feet high, is the highest peak of the Blue Ridge Range. Forty-three peaks exceed 6,000 feet in height; eighty-two peaks exceed 5,000 feet in height. The mountain region embraces 6,000 square miles. The mountains are covered with deep rich soil and clothed with massive forests to their tops. The walnuts, poplars and oaks attain a size that would hardly be credited by one who had not seen them.

All kinds of fruit attain a high state of perfection and all fruits, vegetables and grains are remarkably productive.

Average mean temperature, 59.6 from 1882 to 1897. Average snowfall for same period, 11 inches annually. Precipitation, 50.6. Wettest year on record, 1877; driest year on record, 1897.

North Carolina is rapidly developing in all kinds of trucking and fruit-growing. At the recent National Apple Show at Spokane, Washington, North Carolina took first prize for the finest apples exhibited.

Largest Tannery Extract Plant, United States Leather Company, Old Fort.

Largest Wood Fibre Plant, Champion Fibre Company, Canton, N. C.

Largest Veneer Plant, Thaxton Company, Winston, N. C.

Largest Flat Plug Tobacco Factory, R. J. Reynolds Company, Winston.

Largest Smoking Factory, "Bull" Durham, Durham, N. C.

Largest Cigarette Factory, Duke Cigarette Company, Durham

Largest Seine Fishery, Dr. Copehart, Ovoca, N. C.

Largest Denim Mills, White Oak Mill, Greensboro.

# Guilford County

---

The county of Guildford was formed in 1770 from Rowan and Orange Counties and was named in honor of Lord North Earl of Guilford, Prime Minister to King George III. In 1808 the county seat was removed from Martinsville, to Greensboro (named in honor of General Nathaniel Green).

From Guilford county, west, it is 250 miles to the extreme south border of the State, while from Guildford, North, it is 211 miles to the most Northerly point on the Atlantic Coast. Thus showing Guilford to be in almost the exact centre of the State from North and South.

In the heart of the delightfully healthy Piedmont Plateau, midway between the mountains and the sea.

Guilford, is the only county in the State with two cities with over 10,000 population each, and no where in the State is the hand of improvement more visible than in Guilford county, almost the entire region is dotted over with thriving villages and towns. The homes indicate a high degree of thrift. Guilford has long been recognized as the banner educational county on the State, it is the home of the **noted Guilford battle field of Revolutionary fame**. The largest Denim mill in the world is located here, where abundant labor is always to be found and raw material for the great diversity of manufacturing enterprises located here. **Guilford county has the best public school facilities. The largest number of factories. The great diversity of manufacturing establishments. The most churches and the largest population of any county in the State.**

Guilford, has built 100 miles of good macadam road during the past five years and going steadily forward with the work of good road building, with the result that numerous modern homes are being built in the country along the line of the good roads.

Living is cheaper than in the Northern States, mild healthy climate and mild Winters make little fuel necessary. No ice in winter or droughts in summer to make it necessary for manufacturing plants to close down.

The soil in the Piedmont Section is very much diversified. This added to favorable climatic conditions, offers great Agricultural possibilities for the farmer in all lines of farming and trucking, which finds a ready sale on the local market at good prices.

J. D. Helms, 310 S. Elm Street, Drugs, Fountain Drinks and Prescriptions; Phone 89. Residence, 303 N. Davie; Phone 1381

Accuracy and care by reliable pharmacist in compounding, and the chemically pure drugs used in prescriptions and packages that go out from the store, and the delicious and refreshing ice-cold drinks served at our Fountain, and lowest prices on all goods, speak for our increasing business. We keep everything to be found in a first-class drug store, and solicit your patronage, and hope to have you as one of our many customers.

Truly Yours,

## *The Best Fertilizers for Corn*

That the yield of corn from the average farm can be greatly increased by intelligent and liberal fertilization has been repeatedly demonstrated. Large crops of good corn result from preparing the land well, using the right kind and quantity of fertilizer, good seed and proper cultivation.

# *Virginia-Carolina Fertilizers*

will greatly "increase your yield per acre" of corn or any other crop. In some cases remarkable results have been obtained.

Mr. C. W. Caruthers of Sumpter County, Fla., writes: "Words cannot express the value of your fertilizer. It is really so far ahead of other companies' goods, that it would not pay anyone to use other brands, were they given free and put in the field. I can prove what I say to be a fact. I made a test on five acres. I used on one half the land your fertilizer and on the other half another company's fertilizer, same grade; the land received the same cultivation every time. *I kept a correct account of the amount of money I got off each half and I got \$300 more from the land on which I used Virginia-Carolina Fertilizer than I did off the other half. I got four times as much corn from the land on which I used your fertilizer.*"

Write today to nearest office of the Virginia-Carolina Chemical Company for a free copy of the new 1909 Farmers' Year-Book or Almanac, full of the most valuable and unprejudiced information for planters and farmers; or ask your fertilizer dealer for a copy.
